Choose any color you like! Frogs run about 19 feet long and come with a drogue and stuff-sack.

19 ft Frog - Suggested Retail: \$500

MARINE TROPICAL FISH

Those New Zealand kites come up with the coolest stuff! And Robert vanWeers fish series is a great example.

Choose the French Angel, the Idol, the Clown, or the Longnose Butterfly. Each are about 9 feet. Fill your own sky aquarium!

Connect to a lifter line at the bridle point and top lifter loop.

9 ft French Angel - Suggested Retail: \$240

9 ft Idoll - Suggested Retail: \$240

9 ft Clown - Suggested Retail: \$240

9 ft Longnose Butterfly - Suggested Retail: \$240

PARROT

One of these big inflatable birds will look great perched over your flying field.

This award winner was designed by Otte Harm-Dierk of Germany and is licensed exclusively to GKPI. They stand about ten feet tall and fill through inflation vents in the chest. Like all inflatables, the Parrot works better with a lifter.

We'll make you Parrot(s) in your choice of colors - including the body and wing-tip / tail accents. They are priced at \$450 including bag and drogue. Smiles all-around guaranteed!

10 ft Parrot - Suggested Retail: \$450

FLYING LIGHTHOUSE

Every craggy outcrop on the Oregon Coast features a lighthouse. And now we have a cool portable one to put up on every beach too.

This wonderful inflatable was created by Meik Schlenger of Germany and licensed to GKPI. The Lighthouse includes a deflation zipper and stabilizing drogue.

9 ft Lighthouse - Suggested Retail: \$250

18 ft Lighthouse - Suggested Retail: \$350

28 ft Lighthouse - Suggested Retail: \$450

GONZALEZ BROTHERS

Pedro and Esteban Gonzalez of Spain make the coolest stuff. Check out the awesome Red Devil or the whimsical Chinese Opera Mask series.

Each kite is about ten feet wide and 30 feet long. They are completely soft, fully inflatable and perform with or without a lifter. Mesh openings and zippered vents help with inflation and deflation.

10 x 30 ft Devil - Suggested Retail: \$1250

10 x 30 ft Mask - Suggested Retail: \$1250

SANDERS' SIGNS

We are delighted to now offer the flying road art of Kevin Sanders from Australia.

Kevin is a wonderfully creative kitist who combines technical proficiency and solid avionics with a light hearted sense of humor. In this case, the result is a series of flying road signs that offer unexpected phrasing.

We're making three styles -- the round sign in red, the rectangular sign in blue, and the diamond sign in yellow. The best part is that you choose the message! Think fun! Think creative! Think what road signs would say in a perfect world....

5 x 25 ft Sign - Suggested Retail: \$300

ZIMMERMAN OWL

Here's the coolest kite to come out of Europe in a long time!

He measures 11.5 feet tall and about 11 feet from wing-tip to wing-tip. The owl is completely soft with no sticks. The wings 'flap' in flight and the body undulates.

11 ft Owl - Suggested Retail: \$500

ZIMMERMAN STAR

Great flier! Great looking! Great fun!!

Inflatable Stars come in two sizes and include a long fuzzy tail. If you really like star-watching, try training several together.

7 ft Star - Suggested Retail: \$250

13 ft Star - Suggested Retail: \$450

INFLATABLE AIRPLANE

Here's the ultimate fun kite. It is completely soft with no sticks or spars. It can be 'stunted' on two lines or staked out on display. It is big -- about ten by ten feet. And it is really cool. A single plane, looping and swirling in the sky is a treat. One or two make a fine static display. And a full squad, staked out on a tether anchor really stops traffic.

Soft Airplane - Suggested Retail: \$500

Licensed Peter Lynn Inflatables

Gomberg Kite Productions is licensed to produce these "small" versions of popular giant show kites. But, how can you call a 20 foot kite small??? We carry a large inventory for immediate shipment, and custom colors can be made in just a few weeks at no extra charge. Call us for prices and specifications.

GECKO

Watching this huge lizard "climb" into the wind will amaze everyone. The tail and legs create a realistic motion in the breeze. Yes, it will fly alone, but we strongly recommend a lifter for added stability and flight angle. Drogue included

KITTY CAT

She's guaranteed to scare the heck out of any mouse in the neighborhood. And we promise your new Kitty will be the biggest hit on your flying field, too. Technically, our Peter Lynn Cat isn't a kite. She needs a lifter to fly well. But that doesn't mean that this big inflatable won't be great fun to have around.

20 ft Cat - Suggested Retail: \$1400

OCTOPUS

Inflatable Octopi are Peter Lynn's long-term most popular single-line kites. Our "Octos" are remarkably manageable and easy to fly in 5 to 20 mph of wind. We produce three sizes. BLUE MEANIE

Note feeling blue? Maybe you'd like a Red Devil or a Purple People Eater.

The "Meanie" is a big piece -- about 15 feet from his horns to the tip of his tennies. He is completely soft and inflates through vents.

Check out the fashionable sunglasses, the confident glint in his eye, that dazzling smile, and the too-cool-to-be-on-a-kite footwear.

Performs better with a Pilot Kite and definitely dominates the field.
